54 **Printing apparatus and printing tape cassette.**

57 Described are a printing apparatus and a printing tape cassette for use with this printing apparatus. The printing apparatus combines within one apparatus a first printing region (10) for the printing of ordinary paper and a second printing region (20) capable of preparing a lettering tape (17). By combining the two printing regions within one apparatus,

several elements of the apparatus may be used in common, thus simplifying the overall structure of the apparatus and allowing a simplification and cost reduction of the control device. The two printing regions are disposed adjacent to each other, both within the shifting range of a carriage (4) mounting the printing head (1).

<b>CATEGORY OF CITED DOCUMENTS</b>			
X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document		T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document	

### CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claims:
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

### LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

See sheet -B-

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☒ None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims: 1-15

European Patent  
Office.

EP 91 10 5710

### LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims 1-15 : Printer with ordinary paper print region and adjacent tape print region using same carriage.
2. Claims 16-17 : Tape printer.
